SCANDINAVIAN DESIGN FOR YOUR HOME

## SCANDINAVIAN TREND

Markslojd was founded in 1963 in Kinna, Sweden. The key factors that led to its success are unique Scandinavian design, simple forms and functionality. It is a leading brand in the lighting industry in Scandinavia and around the world.

We established our presence in Poland over 20 years ago. Our wide range of products includes interior lighting, bathroom, garden fittings and crystal lamps.

# MEET THE DESIGNERS

Markslojd company cooperates with Swedish designers who create collections, that set new trends in lighting every year.

## Tom Stepp

*I designed PERN with flexibility in mind. The versatile swing arm gives you the choice of getting light where you need it and save space when you wish.*

*PERN is optimal for setting the mood above the dinner table or your lounge area. This is a functional design for compact living, and also a sculptural piece of lighting that truly makes a statement in the room.*

## Monika Mulder

*I have created the LARRY series with the intention of giving people the opportunity to create a luxury hotel feel at home. Its neat and stylish design fits both in your private home or in the public environment.*

*To create depth in a room, it's important to have many different light points. Therefore, I designed a whole series that can meet many of the needs of the home.*

## Joakim Thedin

*With a wild urge to create a piece that makes the light float freely in the room, I dedicated myself to design the ceiling piece Heaven and the result is beautiful.*

## Tony Irving

*My chandelier is inspired by the balance found in Yin and Yang. It is represented through the combination of smoke coloured and clear crystals.*

# Monika Mulder

Monika Mulder works as a design consultant for Markslöjd.

This year we are launching Kom in 35 cm. She has created the popular series Larry and now Kom in a new set of colours.

## Where do you draw your inspiration from in your design work?

I get inspired by materials, the production and the user. The task itself is the trigger. I love to dig into a project and make the best possible solution with the given ingredients. Often there is a list of demands. Nevertheless, a good concept must go on top of that and in so giving the end product some depth.

With the product Kom the concept was 'what kind of shape can I achieve with the production method' metal spinning. In the sixties it was common with big metal pendant lamps, and I wanted to make my own version of it that would fit in with today's interiors. Something that has been tried and tested but still feels new.

## What does your design process look like? Sketches, models and so on.

First I start to define the challenge and collect information. What is the brief? What products are already on the market? What are the production circumstances?

Then comes the questions of what I want to do and from which angle I will tackle the brief. When I have asked myself all these questions I start the process of generating ideas and developing solutions.

In the case of the Kom lamp I worked a lot with shapes. I start by sketching by hand. Then I make 3d models in the computer but I also test them 1:1 in card board.

The best ideas undergo a couple of more rounds during the development process where I ask myself the same questions I had from the start one more time and in so improving the end product. Initially the shape for Kom was an entire shape in metal. The production method did not allow for the shoulder/neck shape which meant that we had to make a split line.

Then I chose to give the upper part another finish from the bottom part. That was a development that gained a lot concerning expression. And that is what I mean by getting inspired by the production process. I do not see problems as problems. Many times, these problems can be the beginning of something new which you can turn into an advantage.

## How did you start your journey as a designer?

When I attended my education in Industrial Design in the Netherlands I did an internship at the design department at IKEA in Älmhult. That internship turned into a job and I moved to Sweden in 1998 and I worked for IKEA for a few years.

I met a handsome Swede who made me want to stay in Sweden and then I founded my own design firm in Gothenburg. Today I work as a design consultant for different companies, for instance Markslöjd and I must say that designing lighting is my favourite work.

**Monika Mulder's lamp, Kom, will be launched in a new size and in the colours Petrol, Burgundy, Black and White for Fall 2018.**

**Deep Purple**

For me the secret to the colour purple is its unique ability to bring calmness. Its exclusive tones create a sensation of power and control that wash over me leaving me with an understanding of my own value and self worth.

As a dancer Deep Purple symbolizes a connection with my spirit.

“THE REFLECTION OF LIGHT IN THE CRYSTALS BRINGS A SENSE OF HARMONY. TO ENHANCE THE EXPERIENCE I HAVE CHOSEN FOUR CRYSTALS, EACH INSPIRING ITS OWN WAY. THESE ARE MY HIDDEN GEMS.”

**Teal**

I chose Teal as I feel it represents the perfect balance, the combination of blue and green. The calmness of a clear blue sky mixed with the green of a summer meadow. For me Teal creates a feeling of success without a need to exhibit it.

As a dancer Teal symbolizes achievement.

**Burgundy**

The deep colour of Burgundy symbolizes the feeling of the Passion that comes from a loving relationship. Its red and brown hues represent blood and soil, and combined together it forms a colour that connects Heart and v.

As a dancer Burgundy symbolizes a connection with my family.

**Amber**

I chose the amber stone as it generates a honey coloured shine that for me represents the tranquility of the Autumn months. It reminds me of the warm glow of a fire and the peacefulness that comes with relaxing by the fireside.

As a dancer Amber symbolizes the connection with my soul.

"MY CHANDELIER IS INSPIRED BY THE BALANCE FOUND IN YIN AND YANG. IT IS REPRESENTED THROUGH THE COMBINATION OF SMOKE COLOURED AND CLEAR CRYSTALS."

## *Tip!*

Use Expand to illuminate special places in the room, such as a painting that you like to show off.

## 1. Select Design

The Expand series has several models so you can find which best suits your style. Cylinders, spheres and E27 with an LED filament lamp make it possible to customize Expand precisely to the style suitable for your home.

## 2. Select Length

Expand comes in 50 cm and 70 cm. If you prefer the lights to sit more closely together; then choose 50 cm, and if you want a more scattered placement you can use 70 cm.

## 3. Select Accessories

If you are setting up Expand in the ceiling, use a contact for ceiling fixation. You can also place it on the wall, and then it is convenient to use a cord with switch on, to more easy turn on and off.
