The Beauty of Glass  
Lighting Collections  
2019—2020 / Volume II

LASVIT

PROLOGUE

Prologue

Beauty has not been here for a mere ten years. It'd been here since time immemorial, long before we began to worship it. It emerges, nurtures, fades. The dynamic power of the universe, of the planet, of the people. Of you and of me, of all life in all its forms.

Sparks in the eyes, inner flame, flames of passion, jealousy, eruptions on the Sun, invisible signals, floods of emotions. Not belonging to anyone, including us – the handful of devotees spreading the message in its name.

Just what is the Czech Republic and the few worldwide branches? These few hundred years of glassmaking tradition, those masters of the craft, this Leon Jakimič? What is design, or art? Who has the right to take themselves so seriously to place their ego above nature, and impose their judgement on beauty? On the way it's supposed to look, and on the way it's supposed to be viewed. No one, not even you.

Mere mastering the change of state – it's only sand, and then glass. Arts, procedures, nonsense about energy, wasting it or saving it. Market manipulations and light-speed races in disciplines that do not and never did exist.

Let it be, it's already set. Try to be free. Let live the coincidences, moods, feelings, and emotions. Smiles and astonishments. Eyes narrowed or wide open. All the rays, flashes – data, if you will. Stories. Hearts aflame, even if uncomfortable. Yes, even laughter, tears, and magic.

It's not about us, we're only trying for the light beaming somewhere to make an imprint. In the right moment – forever, perhaps – in glass and in such manner to make you gasp for air and turn blind with astonishment: “What beauty!”

For this, we love glass, for this we do it. Try to understand, and who knows – maybe you'll join in.

## NEVERENDING GLORY

All the clowns' faces eaten away by  
greasepaint, ballerinas' ruined feet,

acrobats' **broken** vertebrae,  
sculptors' crushed fingers, actors' coke-  
induced nasal perforations, solo singers'

**teared** vocal cords, guitarists'  
ripped off fingernails, DJs' deaf ears,  
screenwriters' smoked lungs, painters'

etched lungs, **snapped** muscles in  
glassblowers' faces.

All that **beauty**

**hurts.**

Forget the world's biggest festivals.  
The greatest **ROCK'N'ROLL** of all is  
happening outside of them, regardless  
of the misdirected crowds of fans.  
The largest pit is in fact to be found  
hundreds of feet beneath each one  
of us. Who of you happens to dare  
jumping in the downward lift cage and  
fall all the way to the core of things?  
To the place burning hot as **HELL** where,  
after the dark gives way, the beauty can  
struck you blind. Here, this is  
what's happening.

Did you not know that?  
The most beautiful things come to being  
under pressure.

## MUSH-ROOM

THE BIGGEST ORGANISM  
IN THE WORLD IS APPARENTLY  
AN ARMILLARIA MUSHROOM  
GROWING SOMEWHERE IN OREGON.  
I'M NOT SURE I WOULD WANT  
TO GO SEE IT, AS I AM NOT  
INTO LONG-DISTANCE TRAVEL.  
I PREFER TO NESTLE MYSELF  
IN A SOFA, AND READ SOMETHING  
UNDER MY LAMP'S SOFT LIGHT.  
MAYBE SOMETHING ABOUT  
MUSHROOMS... AND THEN VOILÀ  
— HERE'S ONE OF THEM GROWING  
RIGHT INSIDE MY HOME!

**STOP.** Everything that was true  
a while ago is no longer so. What once  
was breathable air suddenly went  
liquid and is now translucent glass.  
Loose sand / running lava / hard,  
amorphous glass. Who knows how it  
came to pass? Everything's a matter  
of perspective, broken reality between  
the living and the dead, between  
true and false, between beauty  
and ugliness. What shall be? Who  
knows — it doesn't have to be, here  
and now, and yet may have a value.

*If, apart from radiant energy, you wish to accumulate kinetic energy, set your **SPIN** spinning to use its moment of inertia.*

*Kinetic energy  $E_k$  bound in a spinning flywheel is calculated by the following formula:*

$$\{ \displaystyle E_{k} = \{ \frac {1} {2} \} J \omega ^ {2} \}$$

*where  $J$  stands for the body's moment of inertia in relation to rotation axis, and  $\omega$  for the angular velocity of the spinning body. As angular velocity is directly proportional to frequency ( $\{ \displaystyle \omega = 2 \pi f \}$ ),*

*the following formula also applies:*

$$\{ \displaystyle E_{k} = 2 \pi ^ {2} J f ^ {2} \}$$

*where  $f$  stands for rotation frequency in rounds per second.*

Imagine waking <sup>up</sup> one day and everything being the οφκει μσλ around. Getting up in late afternoon and falling asleep, weary, in the morning. Cold lunch at midnight and a warm pint at dawn. AND WHY NOT!

WE ALL WANT IT SO MUCH.  
WE CANNOT LIVE WITHOUT IT. THE  
FREEDOM OF CHOICE. WE WANT  
TO MAKE OUR OWN DECISIONS.  
NOBODY'S GOING TO TELL US  
WHICH WAY TO GO. FREEDOM!  
WHAT ARE WE SUPPOSED TO  
NOT DO? IS THIS SUPPOSED TO  
BE FREEDOM? WHY NOT. AM  
I ALLOWED TO HAVE THIS  
THOUGHT? PERHAPS, BUT WHY?  
OR THAT THOUGHT, MAYBE?  
WHO'S SUPPOSED TO KNOW?  
DO WE SPLIT OURSELVES IN TWO?  
SEIZE TO EXIST? AND WHY NOT?

**There's times you  
get stressed to the  
point when nothing  
goes right, times  
you feel like shit.  
Other times you  
know  
a  
pinch is enough  
for you to be able  
to work under  
pressure. Have  
a cup of espresso  
and, despite your  
stomach being in  
knots, fight and  
wring the best  
out of yourself.  
Everything comes  
loose and flows out.  
And then comes  
the relief. And thus,  
over again and  
again, we block our  
happiness while  
trying to express  
ourselves.**

*“Muuuum,  
I want a  
lollipop!”  
“Again?” “Dad said  
it’s OK!”*

Another quick-saccharide bomb explodes. Flood of saliva leaching the dissolving sugar. Coloured smiles, dilated pupils reminding of past, present, or future rose-coloured glasses. All of that goes up. Haaappineees. Cortisol deceives the brain which doesn’t know it’s got more than enough, thus requiring ever more. Once again. And another lollipop.

Ludwig van Beethoven, Ludwig II of Bavaria,  
Ludwig Mies van der Rohe, interview, meanwhile...

I.

Beethoven: "There's a lot to do in the world. Do it quick."

Rohe: "Architecture, for one. Architecture is the will of given era transposed into space." ??

Beethoven: "And what am I, assessed from the perspective of the universe?"

Ludwig II: "An eternal mystery to myself and others alike."

Rohe: "Less is more, believe me!" !

II.

Beethoven: "OK, I'll slow down: I'll be heard in heaven."

Ludwig II: "OK, just don't forget one thing: God is in the details."

Beethoven: "Tell me about it. I don't want to be interesting, I want to be good."

Rohe: "But that's MY line." ↵?

Beethoven: "Does it matter?"

It sounds like those drunk stories retina cone cells share with the barman who's got the know-how to mix light. And what can I get you today, young man? Life's no **RGB**. Colour mood is a personal and changeable matter, every additive meets the others, mixing and winding around. Here **red** met **green**, there **blue** stands on its own, and over there blue-infused **red** is calling for its rights while the raison d'être, the source of light, is entering the scene – white.

It's  
all so clear.  
Yet you always  
find a way to  
complicate it all. An egg.  
No need to dispute what  
came first. Forget cells, black  
holes, mathematics, or fractals.  
Looking at its perfect curves,  
there's no reason to bother with  
the infinite universe, not even  
the inner one. Yes, the egg  
means life, but let it be for  
once and try to perceive  
only one thing.  
Its beauty.

**The awe-inspiring aura of the fungi is not here by mere chance. They were the reason for you to come down from the trees. You should be praying and sacrificing everyone. Everyone claiming that something that's been here for millions of years merely sponges on something else, which at best will uproot and wither in couple of hundred years! Who parasitizes on whom? Do you believe the bees build their combs hexagonal simply to fit their six-legged build? Are the bees connected to a universe where all is pre-programmed, hence they simply do what they're set to?

Or are the poor little things simply trying to create circles and the much-adored shape is coming up by a sheer coincidence?

Could this all be one single truth?

**Y o u**  
know they say it's  
best to stop when the going's  
best. Right before the finish. Not  
everything needs to be cut, trimmed, and  
polished to the point of spoiling the entire  
thing. Park your car a few blocks away from  
your house and walk the rest. Why? The highest  
percentage of car accidents happen within the last

## **STOP, RIGHT NOW.**

few miles away from the waiting hot bath. Stop being  
persistent, do not insist on finishing, and discover the  
charm of what comes to pass the moment before  
undressing, before peeing oneself from tickling,  
before climaxing. Because it's not always  
a matter of life and death, and, at times,  
you feel cold instead of joy and  
you feel like running  
away.

**The dew** is one of the many forms of [precipitation](#)<sup>[1]</sup>. It consists of water droplets<sup>[2]</sup> appearing on an object's surface in the morning and in the evening. It appears when the outer [temperature](#) of a solid object is lower than the ambient dew point. Water vapor then begins to precipitate creating small drops on the surface of a cool object. This effect often comes to pass during [radiation](#) cooling of the [Earth](#)'s surface on bright and windless nights. Radiation cooling is especially intensive in the case of metals, plant leaves, or [glass](#).

Highest amounts of dew emerge in humid air at high [dew point](#). In the Czech Republic, even in such case, the total amount of precipitation does not exceed the level of 0.5mm.
